The Treatments/Therapies We Provide

Below are some of the treatments we provide.

Dysphagia Treatment

Dysphagia can be a troublesome symptom, and it just affects a person physically but makes them weak as well. It is a condition when a person finds it difficult to swallow food. Not treating this condition can cause deficiencies and can also affect the growth of kids. Our Dysphagia treatments include various dietary changes, exercises and speech and language therapies.

Symptoms of Dysphagia

Connect Today

Neurological Speech Disorder

Speech disorders can occur due to neurological reasons too. We work with the patients to understand the underlying cause of speech disorder and follow a well-planned treatment routine.

Connect Today

Motor Speech Disorder Treatment

We follow a unique and friendly approach to treating patients with motor speech disorders. The treatment path we follow includes various strengthening exercises and we also work on the rate of speech of the patient. All of these also help increase the patient's vocal support along with precision while speaking.

Testimonials

What Our Clients Say About Us

We have been visiting here for speech therapy for my son and the entire experience is just excellent. The doctor here is quite friendly and created an achievable treatment plan. Highly recommended.

Sampat Kumar

A really big thanks to the therapist as they provided support when my brother needed it the most. We visited many speech therapists before but it was all in vain. The treatment here helped my brother realize this potential and work on his stammering.

Nisha Agarwal

Fantastic treatment plan and service. The doctor and the entire staff are very kind and friendly. They were quite accommodating and my kid too felt comfortable interacting with them. We saw amazing results in our little one's speech just after a few sessions.
